

## MEDICAL AND SCIENTIFIC WRITING

A service proposed in collaboration with XPeDoc

Our writers are fully qualified to handle your documents. They have a strong experience with the pharmaceutical industry, and display a recognized writing expertise (affiliation with EMWA )

- Capitalize on our experience in **medical and scientific writing** to generate documents combining accuracy, styling, concision, and easy reading.
- Concentrate your time on research and choose the best way to disclose your results: **Electronic or paper publications** (scientific or medical articles, clinical trial and progress reports), and posters, public meetings,...

## MEDICAL AND SCIENTIFIC WRITING : *from initial concept to final publication*

The successful disclosing of your scientific and medical results requires specific abilities:

- Understand the reader's background data and history
- Set up the document's primary and secondary objectives
- Sort and synthesize the information
- Methodically arrange and express the material
- Assess the presentation's terminology
- Critically proofreading to evaluate reader impact

Because of their competences, our writers are especially fit to manage the key clinical research documents such as:

- Investigator's brochure (IB)
- Clinical study protocol and related documents
- Publications and manuscripts
- Clinical study reports

## MEDICAL AND SCIENTIFIC TRANSLATION

We provide our customers with translation and critical revision solutions for all scientific and medical documents.

Such a practice allows us to set up a pool of multilingual and multidisciplinary specialists. Our team of translators/reviewers is proficient in **Bulgarian, Dutch, English, French, Italian, Polish, Russian, and Spanish.**
